

# LeaderShape

Keren G.

## How did you find out about this opportunity?

I first heard about The LeaderShape Institute through one of my advisors who recommended I looked into the TCNJ Office of Leadership Website and Instagram where they would have more information about the program.

[Contact: Dr. Avani Rana, ranaa@tcnj.edu]

## What has your experience been like?

The LeaderShape Institute was a great experience for me. Although it was only four days I find myself implementing what I learned in my everyday life since then. What I have enjoyed the most has been the community that has lasted beyond the Institute. Everyone can attest to each other's growth during that time and thereafter.

## When can a student join?

Students can apply at any point  
The application is live in the Fall semester and the Institute carried out the Winter shortly after.

## What should a student know about this opportunity?

The Institute is a 4-day interactive leadership program held at The College over Winter Break! Students should know that this experience will challenge their current understanding of leadership, help them develop their own style of leadership, and give them a community of faculty and peers that believe in You as a visionary leader.

## Why should ROSCOE students be interested in this?

ROSCOE students would benefit from being part of this experience because they will get a chance to interact with peers from all different areas of school and people that they otherwise would not have met in their time at TCNJ! It will help develop soft skills and create a useful network that first-generation students don't always have access to.

## What faculty or staff do/did you work with?

We had "Family Clusters" that were led by faculty members from all across campus, Dr. Avani Rana, OnSite Coordinators, and many other hands that came together to make our time at Leafedrhshape a successful one.
